## PROFILE

- Software Engineering & CS student| Backend & AI Specialist
- Current Computer Science and Software Engineering Student also an Extern at Pfizer, specializing in Python automation, RAG systems, and LLM-driven document intelligence
- With a deep technical foundation in Java and Spring Boot, I thrive on architecting scalable REST APIs and optimizing complex data workflows
- As a student who loves & enjoys to learn, transitioning from a background in surgical technology
- I bring a disciplined, "zero-error" mentality to the development lifecycle —combining the precision of high-stakes medical environments with a passion for clean, efficient code.

## EXPERIENCE

**Pfizer Supply Chain Document Processing Extern** March 9th 2026 – Present  
*Pfizer*

- Key Focus Areas- RAG systems, Prompt Engineering, Document Intelligence, Python Automation, PANDAS, NLP & Text Processing, Build with LLMS

**Central Sterile & Surgical Technician** February 2023 – Present  
*ROBERT WOOD JOHNSON, Elizabeth, NJ*

- Ensure 100% sterilization and readiness of surgical equipment for 130+ complex cases, including Neurosurgery and Orthopedics.
- Maintain a rigorous sterile field in high-pressure environments, anticipating surgeon needs to ensure patient safety and procedure efficiency.
- Manage critical inventory and document surgical assets with meticulous attention to detail and compliance standards.

**Central Service Technician** June 2021 – June 2023  
*CONEY ISLAND HOSPITAL, Brooklyn, NY*

- Operated and maintained advanced surgical robotics and specialized equipment (Da Vinci, Stryker) for GI and Laparoscopic specialties.
- Prioritized case workflows and prepared sterile instrumentation by analyzing surgical preference cards and anticipating procedural requirements.

**Coach, Instructor, Lifeguard** February 2023 – April 2024  
*BRITISH SWIM SCHOOL, Jersey City, NJ*

- Managed class safety and engagement for groups of 20+ students, following structured lesson plans to meet weekly progress goals.
- Mentored junior instructors and fostered positive parents relationships through effective communication and feedback.

**Prep Cook & Sous Chef** January 2017 – February 2020  
*GATO RESTAURANT, Manhattan, NY*

- Coordinated high-volume kitchen operations, managing inventory systems and cost-control procedures in a fast-paced environment.
- Collaborated on recipe development and execution, ensuring high standards of quality and organizational efficiency.

## EDUCATION

**Bachelor of Science in Computer Science Candidate** Expected graduation May 2028  
*WESTERN GOVERNORS UNIVERSITY, UT*

**Software Engineer Bootcamp** Expected graduation December 2026  
*TRIPLE TEN, WY*

**Associate of Liberal Arts** December 2018  
*MEDGAR EVERS CUNY, NY*

## SKILLS

Python · Java · JavaScript · SQL · HTML/CSS · Spring Boot · Pandas · NLP · RAG Systems · Git · GitHub · Figma · VS Code · Linux/Mac Terminal · LLM Prompt Engineering · Document Intelligence · AI Automation · REST APIs · AWS (EC2/S3) · Docker · CI/CD Basics · PostgreSQL · MySQL · MongoDB

## LANGUAGES

French (Advanced) · Creole (Advanced) · English (Advanced)

## PROJECTS

**Personal Projects**  
Built and deployed 4 full-stack AI-powered web applications using Google Gemini API, FastAPI, React, D3.js, and SQLite — including a recipe generator, multilingual flashcard engine, AI calisthenics coach, and habit tracking visualizer with DNA-strand data visualization
